Exchange Parts

Warranty repairs may be resolved by using exchanged parts with the intent to reduce the amount of time you are without your covered products. New, reconditioned, remanufactured, or repaired parts may be used in this exchange service. In any case, all exchanged parts will have the same limited warranty as service parts and meet Rivian standards. The decision whether to repair, replace, or provide remanufactured parts, along with the condition of the replacement parts, is reserved for Rivian at the sole discretion of Rivian.

Production Changes

Production changes or upgrades to new covered products do not obligate Rivian to update covered products already built with component parts of a different type or design, so long as the covered products function properly with the repair, adjustment, or installation of replacement parts under the warranty.

This Warranty Guide will be updated with a new effective date, shown on the title page, if any warranty terms have changed. The new warranty terms will only apply to covered products sold after that date.

Nothing in this Warranty Guide should be construed as requiring defective parts to be replaced with parts of a different type or design than the original part, so long as the covered products function properly with the replacement part.

Modifications and Waivers

Rivian may cover more service and repair costs than are necessary as detailed in the Warranty Guide. In some cases, Rivian choosing to offer to pay for services and repairs beyond the limited warranty are known as “adjustment programs.” In the event Rivian initiates an adjustment program, Rivian will attempt to contact owners of registered covered products that are affected. Owners may contact Rivian to determine if their products are covered in a broader adjustment program. The choice to use adjustment programs does not affect Rivian’s right to pay for repair and services beyond warranty requirements on a case-by-case basis.

Rivian reserves the right to perform additional services, make changes to covered products, and pay for service and repairs beyond those covered in the Warranty Guide without incurring any obligation on Rivian to perform similar actions on other covered products. This Warranty Guide does not imply any Rivian covered products are expected to contain defects or are completely free from defects. Defects may be unintentionally introduced into covered products during the design and manufacturing processes. Such defects could result in the need for repairs. For this reason, Rivian provides this Adventure Gear Limited Warranty to remedy any such manufacturing defects that result in covered products component part malfunction or failure during the warranty period.
